Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 32-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ivri et al-5586550 in view of Dowell et al-6037587.

Ivri discloses a device for depositing a liquid solution onto a vibrating plate with tapered apertures for forming droplets of a particular size for inhalation. However, the specifically claimed materials of the plate are not disclosed. Applicant has disclosed that gold/gold alloys were known to provide enhanced corrosion resistance. Dowell discloses that it was known to provide a gold plated container for drugs to prevent corrosion of the container or degradation of the drug. It would have been obvious to manufacture the plate of Ivri out of corrosion resistance materials to

Art Unit: 3761

prevent degradation of the drug applied to the plate. Therefore, it also would have been obvious to have used any of the claimed materials(palladium/palladium alloys) as these would simply have been obvious known alternatives to the gold as they were known to also exhibit enhanced corrosion resistance as evidenced by the known prior art disclosed by the applicant on page 12 of the present specification.

Response to Arguments

Applicant's arguments filed 02-12-01 have been fully considered but they are not persuasive.

Both pieces of prior art are indeed analogous art. The applicant's invention is drawn to an inhaler having means for storing a drug. Ivri is drawn towards an inhaler/nebulizer and Dowell is drawn to a means for storing a drug in a chamber without degradation. Whether the degradation of the drug is for a different type of device or for another purpose does not preclude it from advancing ideas or concepts which are applicable to both Ivri and the applicant's invention. Both of these are analogous to applicant's invention and at least some of the problems the applicant attempted to solve.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 3761

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
